FREE anonymous disposal of unwanted,
unused, or expired prescription or
over-the-counter medications.

Approximately, **70% of people** who abuse a prescription medication get them from family or friends,
often from the medicine cabinet.

1 in 4 teens reports taking a prescription drug, that was not prescribed for them by a doctor,
at least once in their life.

In total, **more Americans die from prescription drug abuse** than cocaine, hallucinogens, inhalants,
and heroin combined.

Every **15 minutes**, one American dies from an unintentional drug overdose, most due to prescription
drugs. Unintentional drug overdoses are now the leading cause of accidental death in the United States.
